For Immediate Release:

ANTELOPE VALLEY WATER PLAN MEETING SCHEDULED FOR MAY

Group to present progress, provide timeline for next steps.

LANCASTER (May 13) – The Antelope Valley Integrated Regional Water Management Plan Group has scheduled a stakeholder meeting for Monday, May 19 from 5:00 to 7:00 pm in the Emergency Operations Center at Lancaster City Hall. At the meeting, the Group will provide a brief update of activities since the last stakeholder meeting in January, provide an overview of the timeline and tasks for the next phase of the Plan, and invite participation in a new committee focused on acquiring additional water supplies for the region.

The Antelope Valley Integrated Water Management Plan, which was created after a year-long collaborative effort, describes goals for the Antelope Valley including increasing water supply, improving water quality, protecting the environment, increasing open space and habitat, flood control, and encouraging land use planning for growth that supports the values of the region. All interested parties are encouraged to attend.
