Department Overview

“We deliver regional infrastructure and services improving the quality of life for more than 10 million people in Los Angeles County.”

The Los Angeles County Department of Public Works was formed in January 1985, consolidating the former County Road Department, the County Engineer Department, and the County Flood Control District.

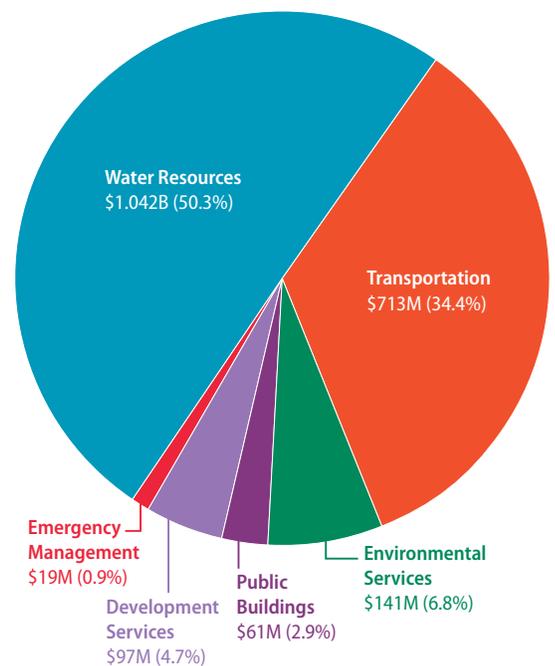

With a Vision to become the most trusted public agency in the region, the Department has been defined by its responsiveness to the public, commitment to provide excellent customer service, and drive to build great community relations. The Department’s workforce takes pride in being public servants providing essential and critical services for all residents and businesses in Los Angeles County.

The Department’s diverse operations are defined within six core service areas: Water Resources, Transportation, Environmental Services, Public Buildings, Development Services, and Emergency Management. Its annual budget of \$2.7 billion is funded by restricted revenues, such as gas excise and sales tax, benefit assessment, water and sewer sales, user fees, and contract cities revenues.

The Department is strategically focused on supporting economic development through business-friendly contracting opportunities that will better serve the County’s small businesses and local worker hiring objectives. In Fiscal Year 2016-17, Public Works executed nearly \$575 million worth of contracts within Los Angeles County, which helped create 7,128 jobs. (See Appendix 2 for more details on Business Outreach).

The Department’s workforce is comprised of nearly 4,000 employees in more than 500 job classifications, including professional, technical, clerical, and skilled crafts.

Headquartered at 900 South Fremont Avenue in Alhambra, the Department has 77 field facilities throughout Los Angeles County.

FY 2017 –18 Core Service Areas Final Adopted Budget

CORE SERVICE AREAS	AMOUNT	PERCENTAGE
Water Resources	\$1,042,006,000	50.3%
Transportation	\$713,360,000	34.4%
Environmental Services	\$140,606,000	6.8%
Public Buildings *	\$60,609,000	2.9%
Development Services	\$96,776,000	4.7%
Emergency Management	\$19,484,000	0.9%
Total Core Service Areas Budget	\$2,072,841,000	100%
Others**	\$632,701,000	
Total Final Adopted Budget	\$2,705,542,000	

* Final Adopted Budget for Public Buildings Core Service Area includes project management costs only.

** Includes cross-business functions.

Water Resources

*"We provide sustainable water supplies and healthy watersheds,
while reducing flood risk for our communities."*

Morris Dam

14
dams

Providing flood protection for
10 million people
and contributing to their water supply

MAJOR PROGRAMS/SERVICES

Through the Los Angeles County Flood Control, Waterworks and Sewer Maintenance Districts, the Department is responsible for Countywide water resource management, which includes flood risk management, water supply, and watershed health.

Flood Risk Management and Water Conservation

The Los Angeles County Flood Control District was established under the Los Angeles County Flood Control Act in 1915. The Act empowered the District to provide flood protection, water conservation, recreation and aesthetic enhancement within its boundaries. The Flood Control District is governed, as a separate entity, by the County of Los Angeles Board of Supervisors.

On behalf of the Los Angeles County Flood Control District, the Department constructs, operates, maintains a regional system of flood control and water conservation facilities that provide flood protection and increase local water supply. The annual average expenditure of the Los Angeles County Flood Control District is \$275 million, with major funding from property taxes and a property benefit assessment for flood control.

The Flood Control District encompasses more than 2,700 square miles and approximately 2.1 million land parcels within 6 major watersheds. It includes drainage infrastructure within 86 incorporated cities as well as the unincorporated County areas. This includes 14 major dams and reservoirs, 483 miles of open channel, 27 spreading grounds, 3,330 miles of underground storm drains, 47 pump plants, 172 debris basins, 27 sediment placement sites, 3 seawater intrusion barriers and an estimated 82,000 catch basins.

The reservoirs assist in recharging groundwater, which helps Los Angeles retain a supply of drinking water. Water from the reservoirs is released, as needed, and moves through a system of open channels into spreading grounds, where it replenishes groundwater basins by slowly percolating, or infiltrating, into the ground. The groundwater basins are accessed by

250,000

residents have access to new recreation opportunities at Flood Control District facilities within one mile of their homes

wells, providing a valuable and reliable source of local drinking water. By conserving water in reservoirs, Los Angeles County relies less on imported water from other areas of California. The flood control system ensures that the greatest amount of water is captured in reservoirs and diverted into spreading grounds instead of being lost to the ocean.

Local groundwater provides one-third of the region's water supply. The Flood Control District's spreading operations significantly help to recharge these local groundwater aquifers.

The Flood Risk Management Program includes planning; operation; maintenance; emergency storm response; storm drain rehabilitation; debris protection; floodplain management; public service; and construction of storm protection facilities, such as dams, channels, debris basins, storm drains, pumps, and removal of accumulated debris from reservoirs, debris basins, and debris retaining inlets.

Public Works also operates and maintains three seawater intrusion barriers along Los Angeles County's coastline. Often unnoticed because of their underground nature, these facilities serve as Los Angeles basin's fresh water sentinels. They protect a significant portion of the area's drinking water supply from ocean water, which constantly attempts to migrate into existing aquifers. Treated imported and reclaimed water is injected deep into the underground aquifers to block this inland migration of saltwater.

Another vital component of the Flood Risk Management Program is the removal of accumulated debris from the numerous reservoirs and debris basins, which protect nearby communities. Debris removal from the reservoirs also restores capacity, which the region needs for stormwater conservation.

Integrated Regional Water Management Program (IRWMP)

The Department leads the Greater Los Angeles County (IRWMP), the largest regional water management group in the State involving 30 regional water management agencies.

The IRWMP planning process successfully brings together and prioritizes water-related efforts in the region in a systematic way to ensure sustainable water uses, reliable water supplies, better water quality, environmental stewardship, efficient urban development, protection of agriculture, and a strong economy. Through IRWMP, the Department partners with regional water stakeholders and agencies to implement regional solutions through open and collaborative stakeholder processes to promote sustainable water use in the Los Angeles region.

In 2015, Public Works:

- Collaborated with 75 cities in 19 watershed groups to develop plans to improve stormwater/urban runoff quality.
- Invested \$77 million in Countywide stormwater quality improvements.
- Secured more than \$27.7 million in IRWMP grant funding.

Over the last 10 years, Public Works:

- **Increased the water conservation storage capacity** at its facilities by over 16,350 acre-feet.
- **Invested more than \$161 million** in rehabilitating its dams and increasing their operational efficiency.
- **Invested more than \$52 million** in enhancing the capacity and operational efficiency of its spreading grounds and seawater barriers.

Public Works recharges enough groundwater from various sources annually to serve **2.7 million residents**

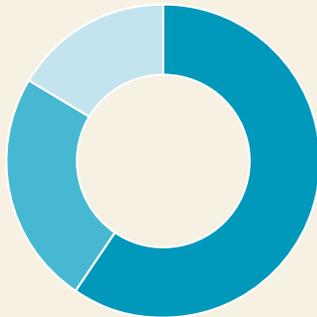

4,600 miles

of sanitary sewers

240,000

water customers served in
Marina del Rey, Malibu,
Val Verde, Acton, Kagel Canyon,
Antelope Valley

Average Annual Contribution to Regional Water Supply*

 **200,000** acre-feet
Stormwater

 **90,000** acre-feet
Imported water

 **50,000** acre-feet
Recycled water

Since its inception in 2008, IRWMP has successfully secured more than \$127 million in water resource grants for 74 projects.

Water Utilities

The Department also provides retail water service to over 240,000 residents through the management of five County Waterworks Districts, the Marina del Rey water system, and the Rancho Los Amigos Water System. The systems are comprised of 1,346 miles of water mains, 122 storage tanks, and 145 pump stations and includes the following five District areas:

- Malibu (SD3)
- Val Verde (SD5)
- Acton (SD5)
- Kagel Canyon (SD5)
- Antelope Valley (SD5)

The Los Angeles County Waterworks Districts operates out of three District offices (Alhambra, Malibu, and Lancaster) and maintains an award-winning online water account management system (MyWAM) for customers to easily access and manage their account online, anytime, anywhere and offers a "Live Chat" feature to enhance the customer service experience.

County Waterworks Districts also manages a robust water conservation program and is on track to meet the State mandate to reduce daily per capita water usage by 20 percent by the year 2020. The program includes:

- Residential Rebate Program - offering rebates to customers on a variety of water-saving devices.
- Cash For Grass Program - offering customers \$1 per square foot of grass replaced with water-efficient landscaping.
- Xeriscape Education Program - education on landscaping with plants that use less water.
- County iPhone application to report Water Waste.

County Waterworks has also partnered with the Cities of Lancaster and Palmdale for the design, construction, and operation of an 18 mile recycled water system and the use of recycled water in the Antelope Valley.

Over the last year, **21 low-flow diversions** have prevented around **182 million gallons** (equivalent to 5 million bathtubs) of polluted urban runoff from entering local waterways

The annual budget for these Waterworks Districts is \$165 million and is financed primarily through water retail sales and general tax levy.

Watershed Health Program

Public Works is responsible for planning and implementing projects and programs to improve surface water quality in unincorporated County areas and is the lead Department for the Los Angeles County Municipal Stormwater (MS4) Permit issued by the Regional Water Quality Control Board to the County of Los Angeles (unincorporated areas) and to the Los Angeles County Flood Control District (jurisdictional areas).

The current 2012 permit includes the County, the Flood Control District and 84 municipalities as permittees, and requires permittees to collectively control pollutant discharges into the municipal stormwater system and to meet 33 Total Maximum Daily Loads requirements. The permit requires a regional collaboration and the Department is participating in 19 Watershed groups that were formed to complete watershed management plans to collectively develop and implement projects/programs to meet MS4 permit requirements and to identify opportunities for water quality projects that will also increase stormwater reuse and augment local water supply. These watershed groups have developed detailed plans that were approved by the Los Angeles Regional Water Quality Control Board.

Annually, the County invests over \$70 million in Countywide stormwater quality improvements.

Sewer Maintenance District

Public Works is responsible for administering the Consolidated Sewer Maintenance District of Los Angeles County (CSMD) and the Marina del Rey Sewer Maintenance District. These Sewer Maintenance Districts provide services to more than 2 million people within the select unincorporated areas of the County, 37 member cities, and 2 contract cities. The CSMD includes over 4,600 miles of sanitary sewers, 153 pump stations, and 4 wastewater treatment plants.

Public Works' sewer maintenance staff inspects over 500 miles of sewer infrastructure each year via a Closed-Circuit Television (CCTV) program to improve system maintenance by early identification and repair of blocked/deteriorated sewer lines. The goal of this inspection program is to reduce overflow events and ensure continuous uninterrupted sanitary sewer service. An important public messaging campaign by the Sewer Maintenance Districts is the "Trap the Grease" Program, which brings awareness of the proper disposal of Fats, Oils, and Grease (FOG) in order to reduce sanitary sewer blockage, overflows, and costly damage.

The Sewer Maintenance Districts' annual budget is \$89 million and is financed through a sewer service charge that is collected as part of the property tax bill.

Rio Hondo Spreading Grounds

KEY ISSUES/CHALLENGES

- **Drought/Climate Change**
 - Our region is subject to extended periods of drought with few, intense rain events.
 - In April 2015, Governor Brown issued an Executive Order requiring a Statewide mandatory reduction of 25 percent in potable water use in response to the unprecedented drought.
 - The Board responded by implementing the Waterworks District's Phased Water Conservation Plan, including water conservation surcharges in the Malibu/Topanga Canyon and Antelope Valley regions.
 - Although the rainstorms of the past winter provided some relief and water conservation targets are no longer mandatory, outreach and education programs are in place to continue to strongly encourage water conservation throughout the Districts.
 - Climate change is expected to reduce the reliability of imported water delivered to Los Angeles County. This will require an increased emphasis on development of local sources of water to increase the sustainability of our water supply.
- **Improving Water Body Health**
 - Federal and State regulations establish water quality standards to protect the beneficial uses of water bodies, which include aquatic habitat and recreation. New regulations continue to be developed.
 - Water bodies within Los Angeles County (rivers, lakes, and the ocean) are impaired by various pollutants, which negatively impact the aquatic habitat and recreation. Stormwater, urban runoff, and other discharges are a source of these pollutants.
 - Many of these rivers and lakes are part of the urban flood control infrastructure belonging to the Flood Control District, such as the Los Angeles River, Verdugo Wash, and the Arroyo Seco Channel.
 - The unincorporated areas of the County and the Flood Control District (along with other Cities in the County) are required to develop and implement programs to reduce pollutants entering water bodies. These programs are costly and existing funding is limited.
 - The cost to meet water-quality standards in Los Angeles County is estimated at \$20 billion dollars over the next 20 years. Most local agencies lack a reliable source of revenue to meet the long-term challenges.

KEY PRIORITIES

- **Regional Water Supply Sustainability**
 - *H2O4LA / Water Resilience* - Finalize the Water Resilience Plan draft and develop a Stormwater Expenditure Plan with broad stakeholder engagement that establishes a joint vision for a secure water future.
 - Increase capacity of reservoirs and spreading basins through systematic optimization of facilities and sediment management.
- **Community Water Resilience**
 - Facilitate and support master planning processes through broad stakeholder engagement and development of representative documents for waterways like the Los Angeles and San Gabriel Rivers.
 - Formalize and launch a program to reduce flood risk and address other community needs in close collaboration with local jurisdictions.
 - Implement strategies that encourage multibenefit project development and leverage a variety of funding sources through targeted collaboration.
- **Infrastructure Management**
 - Implement comprehensive assessment of water infrastructure and develop long-term plans for repair, replacement, and upgrade to optimize flood protection.
 - Develop a master asset management plan to assist in coordinating all operations and management activities and educating local communities.
- **Education and Outreach**
 - Design and implement a public relations strategy that integrates education and outreach on water management practices, ongoing challenges, and future solutions.
- **Financing and Efficiency**
 - Identify and implement most effective methods for staff training and succession planning in support of workforce reinvestment.
 - Promote integration of alternative funding sources and cost-sharing strategies in development of project budgets.
- **Sanitary Sewer System Condition Assessment**
 - Complete closed-circuit television inspection of 4,600 miles of sewer.

KEY PRIORITY STATUS (THIRD QUARTER: JANUARY – MARCH 2018)

Priority: Regional Water Supply Sustainability

1. New timeline and stakeholder engagement framework developed for the County Water Plan. A final draft is anticipated in March 2019 with a series of regional and subregional meetings planned to inform the development of the Plan.
2. Safe, Clean Water Program outline under development. The Stakeholder Advisory Committee has formed subcommittees focusing on program elements including governance, project selection, equity, stakeholder involvement, credits, and rebates, among other issues. Status updates are available at <http://safecleanwaterla.org>.

Priority: Community Water Resilience

1. Established technical team to develop the Los Angeles River Master Plan Update, due for completion by June 2020. The First Steering Committee Meeting was held on April 11, 2018.
2. Continued collaboration with the Department of Parks and Recreation, Watershed Conservation Authority, and San Gabriel Valley Council of Governments on development of the San Gabriel Valley Greenway Network Implementation Plan.
3. Final draft of the Lower Los Angeles River Revitalization Plan was approved by consensus of the Working Group on February 1, 2018 and released on the web. The plan was received by the California Natural Resources Agency at the signing ceremony on April 6, 2018. This completed the requirements of AB 530 (Rendon).

Priority: Infrastructure Management

1. Initiated pilot program to analyze adequacy and physical condition of the Flood Control District's major channels using developed methodology. This activity is part of a broader effort to prioritize upgrades of flood protection infrastructure.

Priority: Education and Outreach

1. Creative materials and messaging for the H2O4LA education and outreach program have been developed and are under review. Public launch of the program is anticipated in June 2018.

Priority: Financing and Efficiency

1. Successfully secured approximately \$20 million in grant funding in Fiscal Years 2016–17 and 2017–18 for projects which provide water quality, water supply, and other water-related benefits.
2. Working with other departmental core service areas to finalize report identifying opportunities and strategies for decreasing external contracting and developing in-house resources.

Priority: Sanitary Sewer System Condition Assessment

1. Resources are being allocated for the second phase of the closed-circuit television sewer line inspection under the Condition Assessment Program. Selection of companies to perform the inspection is anticipated for April 2018.

Transportation

"We provide safe, clean, efficient transportation choices and rights-of-way to enhance mobility and quality of life."

71% of residents in unincorporated Los Angeles County live within 1 mile of a bicycle network

68% of residents in unincorporated Los Angeles County live within 1/4 mile of public transit

MAJOR PROGRAMS/SERVICES

The Department's Transportation Core Service Area promotes Countywide mobility and multimodal transportation opportunities, managing over 4,200 centerline miles of County and contract city roads, transportation infrastructure, programs, and services including:

Road Infrastructure

Public Works manages the County Transportation Improvement Program for road improvement projects and annual operations and maintenance efforts, funded primarily from gas tax funds, Proposition C, Measure R, and new Measure M Local Return funds, and Federal, State, regional grant programs. Projects include traffic safety and operational improvements, pavement rehabilitation, roadway drainage, active transportation, street lighting, green street, and beautification projects.

Road Maintenance and Operations staff operate out of field facilities located throughout the County and provide comprehensive maintenance activities and emergency response, including pavement patching and resurfacing; litter and debris removal; sidewalk, curb, and gutter repair; guardrail maintenance; snow removal; street sweeping; median landscape maintenance; street lighting; vegetation control; bike path maintenance; tree trimming; parkway maintenance; traffic signing and striping; pavement marking; and traffic signal operations and maintenance.

Bridge Infrastructure

Public Works inspects and maintains 533 County-owned bridges and inspects 1,168 city-owned bridges under contract city services. The Department is also responsible for safety inspections and evaluations of 1,277 highway bridges listed in the National Bridge Inventory within Los Angeles County and serves as the lead agency for the seismic retrofit of nonstate-owned bridges within Los Angeles County as part of the Statewide Seismic Safety Retrofit Program.

Traffic Programs & Services

The County leads a multijurisdictional Traffic Signal Synchronization and Intelligent Transportation System effort, which has provided approximately \$275 million dollars' worth of improvements to nearly 70 agencies Countywide through the Los Angeles County Metropolitan Transportation Authority's Call for Projects bi-annual grant funding program.

The Department also monitors and controls traffic signals Countywide from its state-of-the-art Traffic Management Center in Alhambra and manages additional traffic safety programs and services such as the following:

- Suggested Routes To School Program
- County Lighting Maintenance Districts (Streetlights)
- Traffic Safety and Vision Zero
- Los Angeles County Highway Safety Commission (HSC)

Bicycles & Pedestrians

The Department is responsible for the development, and maintenance of the County's bikeway system and the implementation of the County of Los Angeles Bicycle Master Plan adopted by the Board in 2012. The Master Plan will more than quadruple the amount of bikeways from 144 miles to over 800 miles within 20 years. Through Federal, State, and local grant programs, the County was awarded over \$30 million for bicycle and pedestrian projects from the State Active Transportation Program and other Metro grant programs since 2015.

Public Transit

The Department provides local fixed-route transit service to over 3.3 million riders annually and paratransit (dial-a-ride) service in unincorporated areas to meet the needs of community residents, providing access and intermodal transportation mobility and connectivity.

During the summer season, the Department provides transportation to the Hollywood Bowl and area beaches. Other activities include the operation and maintenance of park-and-ride lots, bus stop shelter maintenance, and advertising programs. Transit services are primarily financed with the County's share of Proposition A Local Return, local sales tax funds.

Active Transportation & Healthy Communities

The Department of Public Health identified communities throughout the County with a need for improved health outcomes. In collaboration with other County departments, Public Works' Transportation Core Service Area has a key role in helping to address this challenge through transportation programs and improvements that promote walking, bicycling, transit use, and safety. These active transportation programs increase the public's transportation choices, provide improved connections to transit hubs and destination centers, and improve health outcomes by promoting healthy lifestyles, reducing reliance on automobile travel, and reducing greenhouse gas emissions.

Traffic Safety and Vision Zero

In collaboration with the Department of Public Health and with the support of other County departments, Public Works is establishing an Action Plan to carry out the County's Vision Zero Goal, an effort to reduce and eventually, eliminate traffic-related fatalities and severe injuries on County roadways. This multifaceted initiative relies on a combination of strategies relating to engineering, enforcement, education and evaluation of data and outcomes to continually strive toward zero traffic fatalities.

Aviation

Public Works oversees the operation, maintenance, and development of five County-owned general aviation airports:

- San Gabriel Valley Airport in the City of El Monte (SD1)
- Compton/Woodley Airport in Compton (SD2)
- Whiteman Airport in Pacoima (SD3)
- Brackett Field Airport in the City of La Verne (SD5)
- General William J. Fox Airfield in Lancaster (SD5)

Altogether the County-owned airports encompass 1,750 acres and nearly 6 miles of runway, are home to over 1,800 general aviation aircraft and over 55 privately-owned aviation businesses, and accommodate just over 330,000 aircraft takeoffs and landings each year. These airports are a vital part of the nation's integrated transportation system and also play a vital role in regional and local area emergency response.

\$180+ Million

spent annually on street and road operation,
maintenance and safety programs

KEY ISSUES/CHALLENGES

- **Transportation Funding**

- Funding for County Transportation Improvement Program projects, and operations and maintenance efforts, primarily comes from:
 - Gas tax funds
 - Senate Bill 1 (Beall) provides significant new revenues for road repair and rehabilitation, maintenance, and safety programs beginning in FY 2017–18
 - Local sales tax measures (Proposition C, Measure R and Measure M)
 - Federal, state, and regional grant programs
- Emphasis on rapid rollout of SB 1 – funded projects that the public can see to demonstrate the benefits of the new transportation tax dollars.
- Initiatives have been filed to repeal Senate Bill 1; if enough signatures are collected, the initiative(s) to repeal will be placed on ballot for November 2018 election
- Thoughtful allocation of transportation funds to ensure an effective balance between infrastructure repair needs and ongoing operation, maintenance, and safety programs that promote livability and quality of life of our communities.
- Capitalizing on new sub-regional Measure M funding to promote mobility and active transportation in and around unincorporated area communities.

- **Providing For the Needs of All Transportation System Users**

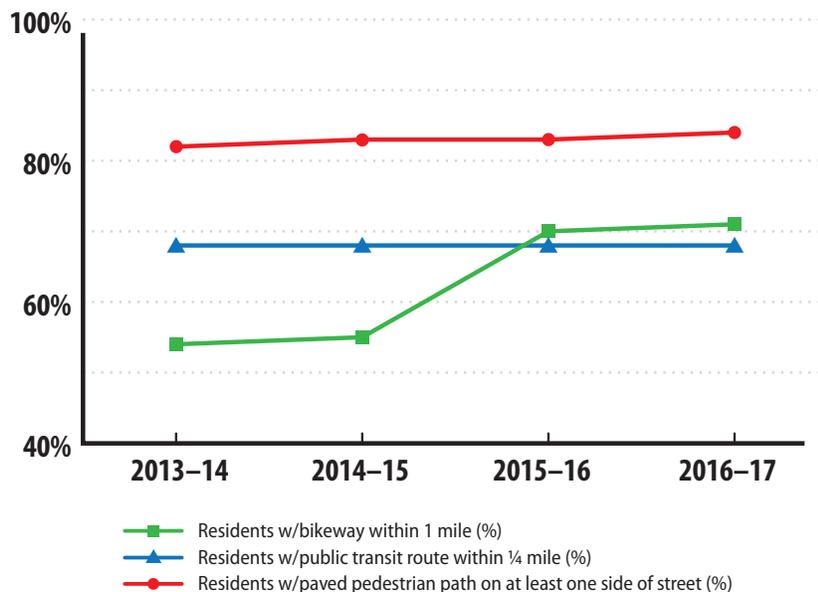

- The duty to provide ongoing adequate investment in state of good repair for the aging bridge, pavement, and sidewalk infrastructure and safety and congestion management.
- Ensure that Public Works address community values, safety, and compliance which encompasses the consistent implementation of multimodal and sustainable transportation plans, policies, and projects.
- Create a culture of innovation that promotes economic, environmental, and community-based sustainable maintenance and management of public infrastructure, including the County's urban forest.
- Improve customer service, transparency, and communication through enhanced and sustainable programs, systems, and initiatives.

9 Sub-regions/Councils of Government in the County (Arroyo Verdugo, Central Los Angeles, Gateway Cities, Las Virgenes/Malibu, North Los Angeles County, San Fernando Valley, San Gabriel Valley, South Bay Cities, and Westside Cities)

KEY PRIORITIES

- **Infrastructure State of Good Repair**
 - Improve and repair pavements, bridges, sidewalks, traffic controls, street lighting, and drainage facilities to keep them in optimal physical and safe operating condition. Use sustainable maintenance and improvement treatments and technologies wherever possible.
- **Vision Zero and Safety Programs**
 - Consistently monitor the safety of streets and roads; plan and implement improvements to enhance safety for all users.
- **Multi-Modal Transportation**
 - Provide active transportation opportunities for pedestrians, bicyclists, and transit users to support regional mobility, recreation, and healthy lifestyles and to support first-last mile transportation options and enhancement of transit-oriented communities.
- **Signal Synchronization, Intelligent Transportation Systems**
 - Provide efficient and safe traffic flow on the region’s arterial highways to improve travel times and reduce fuel consumption and greenhouse gas emissions.
- **Transportation Financing**
 - Senate Bill 1 (SB 1) – Accelerate programming of SB 1 funds and implementation of infrastructure state of good repair and safety projects.
 - Measure M – Work with Board offices to effectively program Local Return funds and identify County priorities for Multiyear Subregional Program funds.

Multi-Modal Transportation

KEY PRIORITY STATUS (THIRD QUARTER: JANUARY – MARCH 2018)

Priority: Infrastructure State of Good Repair

1. Advanced 12 Fiscal Year 2017–18 SB 1 infrastructure repair, rehabilitation, and safety projects into construction committing approximately \$21 million in SB 1 funds.
2. Advanced evaluation of the feasibility and viability of acquiring from Southern California Edison (SCE) 39,000 streetlights serving the unincorporated County area for ownership and operation by Public Works.
3. Initiated collaboration with Public Health, Regional Planning, the County's Homeless Initiative, Sheriff's Department, and County Counsel to respond to the Board's January 30, 2018, motion for recommendations to address unsafe and hazardous RVs on County streets and assistance in connecting homeless persons to housing and support services.

Priority: Vision Zero and Safety Programs

1. Public Works and Public Health filed a Board memo on February 13, 2018, that summarized actions the County took in 2017 on community outreach and engagement, development of the Vision Zero Action Plan, traffic collision data analysis, and prioritization, and funding. The outline of the Action Plan included equity, data driven resource prioritization, and communication and transparency as guiding principles.
2. Continued collaborating with other Vision Zero stakeholders to develop a prioritization formula for High Injury Networks, and other program components.
3. Via Caltrans grant, continued to work with traffic consultant to conduct a systemic safety analysis of County roads to identify priority areas and countermeasures.
4. Anticipate completion of the Action Plan by Fall 2018 with the support of a \$50,000 technical assistance grant from Southern California Association of Governments.
5. Developed a restructuring plan that would combine Vision Zero/Complete Streets with Countywide Transportation Planning to obtain alignment of planning for traffic safety programs with other transportation planning priorities.

Priority: Multi-Modal Transportation

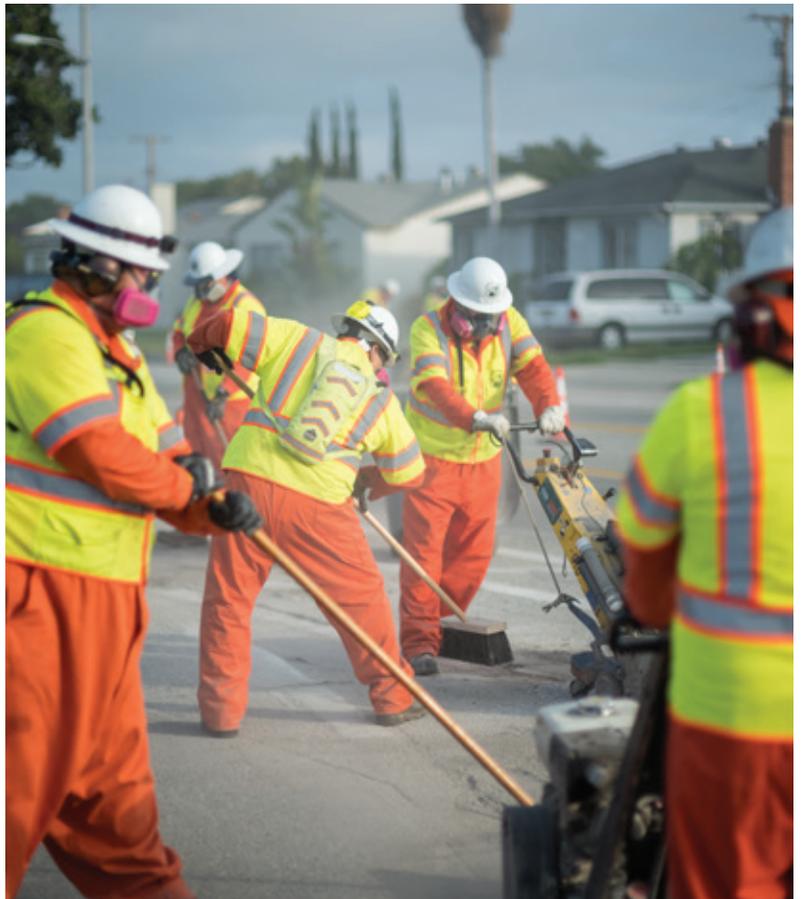

1. Initiated collaboration with the Chief Executive Office, Department of Regional Planning, Public Works, Community Development Commission, and Metro to respond to the February 6, 2018 Board motion to develop processes and methods to coordinate the scoping, infrastructure planning, zoning, and permitting processes for 21 Metro station areas to facilitate transit-oriented development in LA County unincorporated areas. Submitting State Sustainable Transportation Planning Grant application for Transit Oriented Development design guidelines.
2. In collaboration with the First Supervisorial District, Public Health, and Parks and Recreation, continued development of traffic calming and complete street features that can be incorporated into the Pacific Boulevard Demonstration Projects including coordination with Southern California Association of Governments on implementation of a Sustainability Planning Grant for planning and public outreach on the Walnut Park Green Vision.
3. Collaborated with the City of Pasadena to advance financing for a 6-month pilot service to connect the Gold Line Station in Pasadena with the recreational trails in the Altadena area that commenced in April 2018.
4. Collaborating with Metro to commission applications for Metro Blue Line First Last Mile projects in Second Supervisorial District Florence-Firestone community.
5. Initiated advanced project scoping for future grant funding opportunities including Active Transportation Program Cycle 4.
6. Rosemead Boulevard Complete Streets Project – Developing interim project consistent with the Emerald Necklace prioritized projects to be constructed shortly after final State Highway relinquishment expected by late Spring 2018. Directing planning consultant and collaborating with First Supervisorial District and stakeholders on development of the comprehensive Complete Streets Plan.

Priority: Signal Synchronization, Intelligent Transportation Systems

1. *Traffic Signal Synchronization*
 - Foothill Boulevard - Construction completed November 2017.
 - Construction awarded or under construction – nine projects.
 - Design complete on four projects – seeking railroad approval.
 - Nine projects under design. Issued Notice to Proceed for design of Lower Azusa Road/Los Angeles Street Traffic Signal Synchronization Project in January 2018.
2. *Intelligent Transportation Systems*
 - Gateway Cities Fiber Optic and Closed Circuit Television Project – under design.

Priority: Transportation Financing

1. Filed Fiscal Year 2018-19 Road Maintenance and Repair Account project list for Board of Supervisors approval to meet May 1, 2018 California Transportation Commission timeline. The project list is a six-year program consisting of \$213 million in infrastructure repair and rehabilitation and safety projects.
2. Measure M Multi-Year Subregional Programs - Engaged Board offices and Council of Governments/Sub-regions on the County's regional and local priorities for development of five-year project lists and public participation plans.

Environmental Services

"We lead, inspire, and support our communities toward a healthy, waste free future."

MAJOR PROGRAMS/SERVICES

Public Works is the lead County agency responsible for advising the Board on waste management issues and manages numerous Countywide, regional, and unincorporated area programs that monitor, regulate, and manage the collection, treatment and disposal of solid and hazardous waste. Los Angeles County has the most complex solid-waste management system in the nation, comprised of 10 municipal solid waste landfills, 2 waste-to-energy facilities, 12 inert-waste landfills, over 70 materials recovery, transfer/processing and organics management facilities, and over 100 permitted waste haulers.

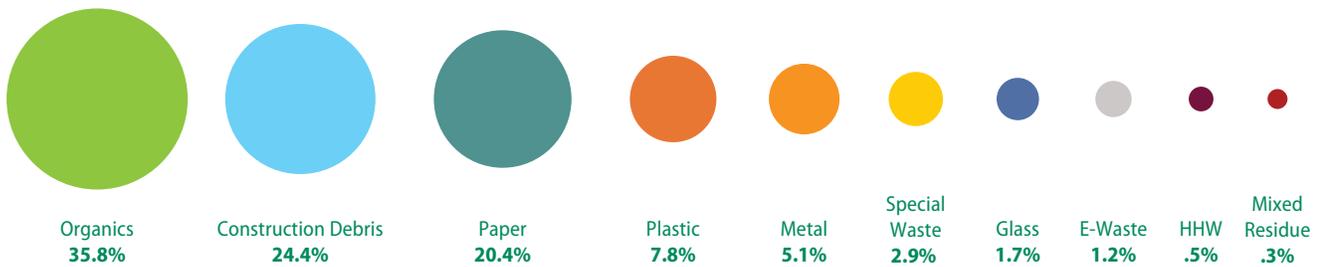

Waste Collection and Disposal

The Department provides trash collection service for approximately 1 million unincorporated area residents and nearly 20,000 businesses through a comprehensive waste collection franchise and Garbage Disposal District systems. In the Antelope Valley, residential trash collection services are provided to approximately 100,000 residents through an open-market competitive system. Each year, about 2.8 Million tons of solid waste is generated in unincorporated areas of Los Angeles County of which approximately 0.7 million tons is disposed of at landfills.

Waste Diversion Programs

In 2014 the County Board of Supervisors adopted the Roadmap to a Sustainable Waste Management Future (Roadmap). The Roadmap lays out a general framework for the strategies and initiatives that the County can implement to decrease reliance on landfills by maximizing the recovery of products, materials, and energy from waste that would otherwise be disposed at landfills. The Roadmap includes recommended strategies, initiatives, and disposal reduction targets to achieve 95% diversion by 2045.

County Waste Stream

The Department manages numerous unincorporated area and Countywide award-winning solid waste reduction and recycling programs, including the Countywide Household Hazardous and Electronic Waste (HHW/E-Waste) Management Program, which collects and manages over 6,300 tons of HHW/E-Waste annually. Other key programs include:

- Environmental Education & School Outreach (Environmental Defenders and Generation Earth Programs)
- Smart Gardening Program
- Smart Business Recycling Program
- Construction & Demolition Debris Recycling Program
- Waste Tire Recycling Program
- Mattress Recycling Program

Integrated Waste Management Planning

The Department is responsible for ensuring that the unincorporated areas comply with waste diversion mandates, preparing and implementing the Countywide Integrated Waste Management Plan, and ensuring long-term disposal capacity for the County and its 88 cities in accordance with the California Integrated Waste Management Act of 1989 (AB939). The Department serves as chair of the County Integrated Waste Management Task Force comprised of representatives from local government; the solid waste management and recycling industry; members of the general public; the business sector; and environmental groups to collaboratively plan the County's solid waste management needs.

Industrial Waste Control Program

The Department provides industrial waste services in unincorporated areas of the County and 37 contract cities, including inspection of 7,600 permitted industrial waste pretreatment systems, and enforcement to protect against illegal, harmful industrial waste discharges to the sanitary sewer system and surface waters.

2016 Waste Generation in Unincorporated County:

- Population: **1.1 million**
- Waste generation: **2.8 million tons**
- Equivalent to **14 pounds per person per day**

2016 Waste Disposal in Unincorporated County:

- **0.7 million tons** disposed in landfills
- Equivalent to **3.6 pounds per person per day**

6,300 tons

Household Hazardous Waste/
E-Waste Collected

26,000 gallons

used motor oil collected

18 tons

tons of batteries collected at
designated County Libraries

Underground Storage Tank Program

The Department permits, monitors, and inspects hazardous material underground storage tanks within the unincorporated areas of the County and 77 cities for compliance with local, state, and Federal requirements. Currently, the Department is monitoring over 4,400 underground tank systems in the County to protect public health and safety, as well as groundwater.

Industrial/Commercial Facilities Program

The Department inspects and issues certificates of inspection for over 3,100 facilities within the unincorporated areas to implement Best Management Practices to protect stormwater and our waterways.

KEY ISSUES/CHALLENGES

- Residents and businesses in Los Angeles County currently generate 28 million tons of solid waste per year, of which 2.8 million originate in unincorporated areas. The management of this waste in a sustainable manner is a major challenge, which involves waste collection, outreach and education, maximizing waste reduction and recycling, development of alternatives to landfills, and ensuring adequate disposal capacity for the waste that cannot be recycled or otherwise diverted. Waste disposed at landfills is also a major source of greenhouse gases that contribute to climate change.
- There is limited potential for new in County landfill capacity to meet the long-term disposal needs of Los Angeles County.
- Industrial waste discharges and the underground storage of hazardous materials, if not properly managed, can lead to surface and groundwater contamination which impacts health and safety and the environment.

KEY PRIORITIES

- **Roadmap to a Sustainable Waste Management Future**
 - Implement the County’s Roadmap to a Sustainable Waste Management Future to decrease reliance on landfills and achieve zero waste by 2045.
 - Update the 2011 Report to the Board on expanded polystyrene food containers in Los Angeles County.
 - Assist Public Health in responding to a Board Motion regarding a Pharmaceutical and Sharp Waste Take-Back Program for the County unincorporated communities.
 - Assist businesses in the County unincorporated communities in establishing recycling programs, including organics recycling.
 - Promote and support the development of conversion technology facilities in Los Angeles County as alternatives to landfills.
- **Disposal Capacity Planning**
 - Update the County’s long-term disposal plan to ensure adequate disposal capacity for all 88 cities and the County unincorporated communities.
- **Illegal Dumping**
 - Illegal dumping continues to impact roads, streets, and alleys in the County unincorporated areas at the rate of approximately 13,000 tons annually. As part of its efforts to discourage illegal dumping and encourage residents to report it for cleanup when they see it, the Department continues to conduct education and outreach campaigns which includes media outreach, bus shelter advertising, and other efforts.
- **Industrial Waste Program**
 - Complete a fee study for the Industrial Waste Program and submit recommendations to the Board for consideration regarding revised fee structures.
- **Sustainability and Resiliency**
 - Enhance sustainability and resiliency of infrastructure through implementing the Envision rating systems and supporting the development of the County Sustainability Plan.
- **Clean Fuel Fleet**
 - Incorporate clean fuel vehicles, such as electric and CNG into the Public Works Fleet.

Solid Waste Quantities in Los Angeles County

Generation = Diversion + Disposal

Amount of trash generated

**28 million tons
per year**

Amount of trash diverted

**18.2 million
tons per year**

Amount of trash disposed

**9.8 million tons
per year**

KEY PRIORITY STATUS (THIRD QUARTER: JANUARY – MARCH 2018)

Priority: Roadmap to a Sustainable Waste Management Future

Implement Various Strategies and Initiatives in the Roadmap

1. Held a County Operations Working Group meeting to discuss Resource Management Plans and how they can help reach the Roadmap's diversion goals as well as comply with mandates. An Outreach and Education Subcommittee meeting was also held to discuss upcoming educational events, such as an additional Household Hazardous Waste Collection event in the City of Compton in May 2018. Also discussed developing toolkits for initiatives to facilitate outreach and education.
2. Continued implementing the Organics Management Plans for all three focus areas (County Unincorporated Communities, Regional/Countywide, and County Operations) for AB 1826 (Mandatory Commercial Organic Waste Recycling) and SB 1383 (Methane Emissions Reduction) compliance:

County Unincorporated Communities

Assisted multifamily residential properties in their recycling efforts by distributing free in-unit recycling bins to large complexes in the County unincorporated communities. Additionally, developed and launched the Food Donation and Recovery Outreach Program (Food DROP).

Regional/Countywide

A Countywide Organic Waste Management Plan has been completed. Following Administration review, the plan will be made available to cities, CalRecycle, the waste management industry, and the public.

County Operations

Continued educating County departments/facilities on AB 1826 compliance requirements and anticipated SB 1383 requirements during the Roadmap's County Operations Working Group meeting as well as provided presentations during the Facility Managers Network meeting and the Department of Park and Recreation's Water & Energy Taskforce meeting.

Update the 2011 Report to the Board on "Expanded Polystyrene Food Containers in Los Angeles County"

1. Filed an update to the report entitled Polystyrene Food Service Ware in Los Angeles per the August 1, 2017, Board Motion, on January 12, 2017.

Establish recycling programs, including organics recycling

1. Worked with the Internal Services Department to issue new waste hauling contracts that require waste haulers providing service to County facilities to provide solid waste and organic waste recycling services upon request. In addition, expanded the pre- and post-consumer food waste recycling program for Public Works Headquarters' to include special events at Headquarters, which will serve as a model for other County facilities.
2. Developed and implemented the Food Donation and Recovery Outreach Program (Food DROP), which will facilitate and promote safe donation and distribution of excess edible food to reduce food waste in the County unincorporated communities and help feed the hungry. A dedicated website (www.FoodDROPLA.com) for the program was developed and launched in late January 2018.

Conversion technology facilities

1. Public Works is supportive of the development of solid waste conversion technologies to diversify solid waste management practices. Public Works surveyed the waste industry and jurisdictions to identify potential sites for conversion technology projects, which will be included in the updated Countywide Siting Element.

Priority: Disposal Capacity Planning

Countywide Organic Waste Management

1. As mentioned in the Roadmap Priority above, a Countywide Organic Waste Management Plan has been developed and will be made available to cities, CalRecycle, the waste management industry, and the public once finalized.

Countywide Siting Element

1. Updated the draft document to reflect the impact of new laws and changes in disposal capacity. Prepared the Draft EIR for the revised Siting Element.
2. Surveyed waste industry and jurisdictions to identify potential sites for conversion technology facilities to be included in the Siting Element.

Mass Debris Management

1. The Mass Debris Management Plan for the County unincorporated areas, which is designed to manage debris collection, reuse, recycling, and disposal of debris generated by a disaster event, was revised to address CalOES' comments and resubmitted to CalOES. Subsequently, it will be submitted to FEMA for review and to the County Emergency Council for adoption.
2. We are developing a Standard Operations Guide to the Los Angeles County Operational Area Mass Debris Management Plan (Guide). This Guide will provide key points of coordination, critical information to make key decisions, timelines, checklists, and other information to guide staff's response during a disaster. Following consultations with stakeholders, a draft Guide has been completed. Upon Administration approval, the Guide will be subsequently presented to the County Emergency Management Council.

Priority: Illegal Dumping

1. Ran three media campaigns to encourage residents to keep communities clean by reporting illegal dumping. Campaigns included radio and television spots, web banners, digital billboards, social media, and public service announcements. Media campaign partners included Los Angeles Dodgers, Los Angeles Clippers, Los Angeles Rams, and multiple radio stations. Included articles in the quarterly newsletters for the Residential Franchise and Garbage Disposal District areas, to inform residents of how to report and prevent illegal dumping, provide information of the annual clean up events, and e-waste events.
2. A Free Dump Day was held at the Chiquita Landfill this quarter, which resulted in 130 loads and 74.17 tons collected from the Castaic and Val Verde area. Additionally, free dump day, mattress collection, and tire recycling collection events are currently being coordinated for the Antelope Valley, Sunshine Canyon Landfill, and Lancaster Landfill.

Priority: Industrial Waste Program

1. Continuing to analyze data collected to establish a baseline for an industrial waste fee study.

Priority: Sustainability and Resiliency

1. Hosted 2 Envision training sessions at Public Works which trained 49 Public Works staff and 11 staff from 6 different County Departments. Also facilitated four training sessions for Design Division staff on the use of the Sustainable Infrastructure Guidelines.
2. Initiated a project to install a solar carport at Public Works Headquarters Campus. The project will showcase a new large scale renewable energy system in the community by installing a 705 kW solar energy capacity while saving the Department \$2.7 million dollars over the 25 year life of the project.

Priority: Clean Fuel Fleet

1. Completed the installation of 14 EV Charging stations in the motor pool.

Public Buildings

"We design and deliver high performing buildings and facilities for people and programs to thrive."

Camp Kilpatrick

In 2016–17:

- Completed **29** new or renovated County buildings valued at **over \$355 million**
- Achieved **41 percent local worker hiring** participation on key construction projects

MAJOR PROGRAMS/SERVICES

Capital Projects Program

The Department's Public Buildings Core Service Area provides program/project management services for the County's Capital Projects Program. This includes the renovation of existing building facilities, and the master planning, programming and construction of new building facilities for many County departments including Animal Care and Control, Beaches and Harbors, Fire, Health Services, Mental Health, Parks and Recreation, Child Support Services, District Attorney, Probation, Public Health, Public Libraries, and Sheriff.

Currently, the Department manages approximately 232 active projects with a total construction value of over \$847 million.

The Department utilizes a variety of methods to deliver capital improvement projects, including design-build, job order contracts, traditional design-bid-build, and developer project delivery. The Department works in conjunction with the Board of Supervisors office, Chief Executive Office, and the client departments to define project parameters, and to select the project delivery method that best enables the County to meet the established project goals and objectives. The Department recently delivered the \$230 million renovation of the Historic Hall of Justice via Design-Build project delivery.

The County Capital Projects Program also includes the allocation of one percent of the design and construction cost for each project to the Civic Arts Program for the integration of high-quality civic art into County's capital building projects per the County's Civic Art Policy adopted by the Board of Supervisors in 2008, aimed at improving the physical and cultural environment and the quality of life of County residents.

Green Building

The Department has a proven track record of implementing sustainable practices in the design and construction of capital improvement projects through:

- County's Green Building Policy. New buildings with an area of 10,000 square feet or more must achieve a minimum of Silver Certification under the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) rating system.
- County's Low-Impact Development to address stormwater runoff and enhance groundwater quality.
- California Green Building Standards Code (CGBSC) to meet minimum energy efficiency and potable water use standards.

The recently completed renovation of the Historic Hall of Justice achieved a LEED GOLD Certification (SD1), Manhattan Beach Library a LEED GOLD Certification (SD4), East Animal Care Services Center a LEED SILVER Certification (SD5), Arcadia Mental Health Services Center a LEED SILVER Certification (SD5).

The County's Probation Priorities

Campus Kilpatrick (SD3)

The Project consisted of the design and construction of a new, approximately 65,000 square-foot juvenile detention facility on approximately 11 acres of County-owned land in Malibu. The new 120-bed small group therapeutic model facility, also known as the L.A. Model, provides 5 homelike cottages that emphasize small group living concept, and program spaces such as dining hall, gymnasium with performance stage, classrooms, vocational workshop and a commercial kitchen for the culinary arts program. The new Campus Kilpatrick embodies a culture of care to enhance therapeutic opportunities for moderate to high-risk juvenile offenders and improve their future.

On August 1, 2017, the State Fire Marshal issued Certificate of Occupancy for the new Campus Kilpatrick facility. Probation Department has moved in and the facility is in full operation.

The County's Homeless Initiative

The Homeless Initiative is designed to generate a coordinated set of County strategies to reduce homelessness through an intensive, inclusive planning process in six areas: prevention of homelessness, subsidized housing, increased income, case management and support services; creation of a coordinated system; and an increase in affordable housing. This past year, Public Works has worked with the Health Agency to develop plans at four County locations to construct Crisis Residential Treatment Centers with a total of number of 240 beds to support and advance this initiative. In addition, we are designing Recuperative Care Centers into the master plans at Harbor-UCLA, LAC+USC, Olive View-UCLA, and Rancho Los Amigos Medical Centers.

Accomplished the following County workforce development objectives in construction contracts:

- An average of **47 percent participation rate** for Job Order contracts with aspirational Local Worker Hire goals.
- An average of **41 percent** participation rate for projects with specific Best Efforts or Mandatory Local Worker Hire goals.

Public Buildings:

- Manages about **232 active projects with a total construction value of over \$847 million**
- Develops facilities for **17 County departments**

Stoneview Nature Center

The County's Sheriff Priorities

Mira Loma Women's Detention Center Facility [SD5]

The project will renovate and expand the existing Mira Loma Facility to create campus like setting that will house 1,604 medium/low security inmates.

Consolidated Correctional Treatment Facility [SD1]

The project will replace the existing outdated Central Jail Facility with a new 3,885-bed facility focusing on mental health and substance use disorder detoxification needs. This new facility will provide provisions for a new Inmate Reception Center for male and female inmates to streamline the intake, classification, and placement of mental health, medical, and substance abuse inmates facilitating an improved delivery of health services and early planning for transitioning back into the community.

KEY ISSUES/CHALLENGES

- **Project Delivery**
Developing successful complex capital projects that meet the needs of the community and county departments provides an array of diverse opportunities to address the communities' goals and needs while providing the setting for a collaborative work environment. Project development is an excellent opportunity to address:
 - Community input for projects
 - Local and targeted worker hiring Small Business Enterprise & Disabled Veteran Business Enterprise
 - Business opportunities

KEY PRIORITIES

- **Transparency**
Delivering high-quality facilities that will serve the needs of our community relies on transparency and clear communications with all stakeholders, such as:
 - Board offices
 - County departments
 - Impacted community/municipalities
 - Jurisdictional agencies
 - Collaboration with local agencies
- **Customer Service**
Providing inclusive project delivery services for County departments to obtain the best value and to meet their mission and operational objectives for community services.

Public Works continually assesses its business processes and utilizes current social media and other means to keep communities involved and to:
 - Advertise project specific community input opportunities
 - Expand local worker hiring
 - Increase collaboration with various business organizations
 - Increase business opportunities by strategically selecting the extent of services solicited

KEY PRIORITY STATUS (THIRD QUARTER: JANUARY – MARCH 2018)

Priority: Transparency

Collaboration with other Agencies

1. To keep all stakeholders informed throughout the delivery process of our projects, the following meetings were held:
 - Project Review Board meeting to discuss the status and upcoming events for all Park projects. Attendees of the meeting included representatives from Chief Executive Office, Parks and Recreation and Public Works.
 - Project Review Board meeting to discuss the status and upcoming events for all Health Agency and Fire projects. Attendees of the meeting included representatives from Chief Executive Office, Health Services, Public Health, Mental Health, Fire Department and, and Public Works.

Priority: Customer Service

Sustainable and Green Buildings

1. LEED certification in process for 3965 South Vermont Avenue, a renovation project.
2. LEED Gold certification is underway for the Sheila Kuehl Mental Health Center, a new building.
3. LEED certification process is underway for the MLK Child Care Center, a renovation project.
4. LEED Silver certification is planned for the Fire Station 104, a new building.

Technology

1. Considering alternate Contract Management software other than Oracle Primavera CM 14 to see if other software would be more compatible with the Project Controls System.
2. Researching availability of vendors to determine the feasibility of conducting project specific testing of new project control platforms to provide cost, schedule and reporting functions for large scale projects, such as Men's Central Jail Replacement, CCTF.

Alternative Contracting Methodologies

1. To provide the best overall value and benefit to the County, Public Works will be utilizing alternative contracting methods on the following projects:
 - Castaic Sports Complex Skate Park, George Lane Skate Park and the Sheila Kuehl Mental Health Center are being delivered through a Design Build process.
 - Agricultural Commissioner/Weights & Measures Metrology Labs Renovation will be delivered using a combination of Low Bid and JOC contracting methods.

Development Services

"We help people build their dreams and ensure safe and healthy homes and communities."

3,800 Subdivision improvement plans reviewed

10,000 building permits valued at \$1 billion issued annually

MAJOR PROGRAMS/SERVICES

The Department's Development Services Core Service Area provides land development and permitting services and code enforcement programs and services throughout the County.

Land Development

The Department works in partnership with the Department of Regional Planning to deliver responsive land development, permitting, and inspection services and streamlined permit approvals for customers by deploying a new online enterprise plan checking system. About 3,800 subdivision-related plan reviews are performed and 180 new subdivision maps are recorded each year. In addition, the Department provides land development and County Surveyor services for 42 cities through contract city services.

Permits and Inspection

The Department is also responsible for the enforcement of building regulations for public and private buildings and operates out of 10 regional permit offices, providing building permits and inspection services. An average of 10,000 building permits with a valuation of about \$1 billion are issued annually and made available online via the Department's interactive "Building Permit Viewer" website. In addition to online permit services, the Department provides Building Official services for 15 cities through contract city services.

In addition to building permits, Public Works also provides permit and inspection services for general construction, transportation, and filming activities within unincorporated County public rights-of-way and miscellaneous activities affecting flood control district facilities. The Department also provides permit and inspection services for activities in city public rights-of-way for several contract cities. About 25,000 permits are processed annually.

The Department also provides confined space underground inspection services for new flood control district facilities.

Code Enforcement and Property Rehabilitation Program

The Department performs code enforcement activities related to property maintenance to improve public safety and quality of life in unincorporated communities. The program is operated on a complaint basis to investigate and resolve public nuisance, unsightly property conditions or unpermitted construction issues within a community. Each year, the Department processes about 2,500 code enforcements cases, 1,400 property rehabilitation cases, and 800 Nuisance Abatement Team (NAT) cases. The NAT cases typically include County regulation violations enforced by the Departments of Regional Planning, Health Services, Fire, and Animal Control and require the assistance of multiagency Task Force, including the County law enforcement and District Attorney's Office for enforcement actions.

In addition, the Department performs code enforcement activities related to public rights-of-way, on a complaint basis, to investigate and resolve unpermitted encroachments. The Department also investigates illicit/undocumented connections to flood control district facilitates for resolution and proper documentation.

Graffiti Abatement

The Department also administers the County's Graffiti Abatement Program, which is tasked with the removal of graffiti in and around public rights-of-way in the unincorporated County and flood control district facilities in the unincorporated County and cities. The Program also includes a youth education component regarding the consequences of engaging in graffiti vandalism. The Department contractors remove approximately 10 million square feet of graffiti per year.

KEY ISSUES/CHALLENGES

- Expanding local economy and demand for building stock in the housing and business sectors.
- Stakeholder demand for multipurpose use of public infrastructure and the creation of public places/spaces within the community
- Modernizing the County General Plan to meet the needs and demands of multiple stakeholder groups, communities, and business interests.
- Public demand for transparent local e-Government services to keep pace with those available in the private sector commercial market place.
- Community blight and aging housing stock in older neighborhoods.

KEY PRIORITIES

- **Deliver a Collaborative Plan Approval, Permitting, and Inspection Program**
 - Foster a collaborative culture to shift from the role of regulator to partners in the process of approving and building healthy and safe homes and communities.
 - Effect shorter turnaround time from application submittal to inspection sign off.
 - Implement concierge services to assist applicants at the time of submittal by providing a road map of the review and approval process.
- **Create Regional Development One-Stop Centers**
 - Create Regional Development One-Stop centers at the local District field offices.
 - Implement the latest meeting technologies, such as video conference, at the local District field offices.
- **Expand eGovernment Services**
 - Create a Countywide, enterprise-wide online permitting, entitlement, and project inspection system.
 - Implement construction inspections utilizing mobile digital platforms.
 - Implement electronic plan checking and e-filing systems for all District field offices.
- **Develop a Streamlined Solar Permitting and Inspection Process**
 - Expedite permitting and inspections.
 - Address regulatory and technological challenges.
 - Build relationships to improve communications between the sectors.
- **Online Access to Development Services Documents**
 - Scan all tract, parcel, single-lot maps, and plot plans.
 - Scan all related study reports.
 - Scan all permits.
 - Scan all other pertinent documents.

KEY PRIORITY STATUS (THIRD QUARTER: JANUARY – MARCH 2018)

Priority: Deliver a Collaborative Plan Approval, Permitting, and Inspection Program

1. Currently developing a concierge service program.
2. *Newhall Ranch Developments:*
 - A bulk grading permit was issued for Mission Village in September 2017. Public Works is working closely with FivePoint on the implementation of Neighborhood Electric Vehicles (NEV) within the Ranch. Conducting bi-weekly project schedule meetings to keep project on track.
3. *Alameda Corridor East Project:*
 - Issued permits and performed inspections to facilitate the construction of rail crossings and separations.
4. *Vermont Corridor:*
 - Collaborated with the Community Development Commission, Department of Regional Planning, the Fire Department, and the design team to address critical issues. Building plan submittal for the first site is anticipated the first quarter of this calendar year.
5. *Centennial at Tejon Ranch Specific Plan:*
 - Centennial is currently responding to comments made by the public during the DEIR public comment period. Public Works will participate in a meeting with Centennial and Caltrans to discuss any concerns with the traffic study.
 - Public Works is collaborating with Regional Planning on the preparation and adoption of a Development Agreement.

Priority: Create Regional Development One-Stop Centers

1. Currently working with the Chief Executive Office and County departments to initiate improvements to the La Puente and San Gabriel Valley district offices. The new offices will provide increased space to accommodate several County departments as part of the enhanced one-stop centers.

Priority: Expand eGovernment Services

1. Continue to work toward full implementation of the EPIC-LA electronic permitting system.

Priority: Develop a Streamlined Solar Permitting and Inspection Process

1. In compliance with State law, Public Works staff continued to provide a one-day turnaround time for plan review and single inspections for residential photovoltaic installations.

Priority: Online Access to Development Services Documents

1. Continued to scan existing permit records and related documents to facilitate electronic full public access by 2022.

Emergency Management

"We maintain a highly trained and equipped workforce to respond to and recover from daily incidents, local emergencies, and major disasters."

50,000 annual calls for service → **24 Hour** Dispatch Center

MAJOR PROGRAMS/SERVICES

As public safety partners, the Public Works Department maintains a highly-trained and equipped workforce to respond to and recover from daily incidents, local emergencies, and major disasters.

Emergency Management

Public Works assists the Office of Emergency Management with Countywide emergency planning and preparedness activities, is a member of the County Emergency Council, and also serves as lead of the Construction and Engineering Branch of the County Emergency Operations Center (CEOC).

The Department's staff maintains its own Department Operations Center to manage local emergency response and to support County emergency operations during major emergencies and disasters. The Department's Operations Center was activated three times in 2016-17 in response to severe storm conditions.

Department Dispatch Center

As part of its emergency management function, Public Works maintains a 24-hours-a-day Dispatch Center and hotline (1-800-562-HELP) and coordinates more than 50,000 service and emergency calls annually, including reports of graffiti, potholes, hazmat spills, water service disruption, illegal dumping, sewer overflows, damaged signs, and malfunctioning signals. The Dispatch Center also coordinates road closures requested by other safety responders and maintains a road closure website of County-maintained roads to keep the public informed.

ShakeCast/Earthquake Response

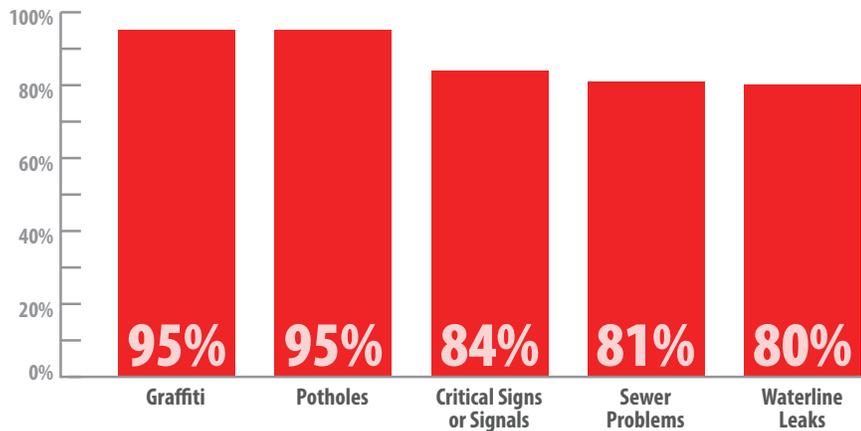

In partnership with Caltech, Public Works developed and maintains an integrated earthquake computer application, which utilizes infrastructure asset data (dams, bridges, etc.) and real-time earthquake shaking intensity data to evaluate prioritize earthquake damage risk. Public Works utilizes ShakeCast data to strategically deploy inspection teams throughout the County to areas of highest-damage potential immediately following an earthquake.

Financial Impact of Recent Disaster Events:

2004–05 Winter Rainstorms	\$111.2 M
2007 Wildfires	\$3.3 M
2008 Wildfires	\$0.5 M
2009 Station Fire	\$13.5 M
2010 Winter Rainstorms	\$51 M
2011 Wind Storms–San Gabriel Valley	\$5.4 M
2013 Powerhouse Fire	\$2.2 M
2014 Bouquet Canyon Road	\$2.7 M
2014 Winter Rainstorms	\$4.8 M
July 2015 Storm	\$5.6 M (Monthly)
2015 Winter Rainstorms	\$8.7 M
2016 Sand Fire (initial estimates)	\$4.8 M

First Responder Services

Completion rate, not adjusted to account for weather conditions within adopted time standard

KEY ISSUES/CHALLENGES

- Employee preparedness and continuous training on Emergency Management.
- Increasing threat of large-scale events.
- Maintaining a state of operational readiness for public works infrastructure.
- Procuring accessibility to “as-needed” contracts to supplement disaster response.
- Providing assistance to regional agencies on disaster response and recovery.
- Coordinating response with multiple municipalities and first responders/resource agencies.
- Ensuring communication in planning/response/recovery phases across the Country.

KEY PRIORITIES

- **Public Works Readiness in Response and Recovery**
 - Maintain a constant state of readiness for Public Works responders to address emergencies impacting communities in a responsive and collaborative manner.
- **Advance Public Works as a Trusted Agency in Emergency Management**
 - Assume a recognized role in emergency management amongst other agencies in Los Angeles County to advance its role as a first responder.
- **Homeless Outreach**
 - Collaborate with other responding agencies on the safety of, and impacts on, the homeless community in all phases of incident management, including response and recovery efforts.
- **Communication**
 - Develop and maintain communication strategies for internal and external operations.
- **Workforce Reinvestment**
 - Invest in Public Works’ Infrastructure and provide appropriate resources to maintain a modernized Department Operation Center and emergency response equipment.
 - Develop a Continuity of Operations Plan for essential Public Works’ Core Service Areas.

KEY PRIORITY STATUS (THIRD QUARTER: JANUARY – MARCH 2018)

Priority: Public Works Readiness in Response and Recovery

1. Public Works hosted the three day Federal Emergency Management Agency (FEMA) ICS 300 Intermediate Incident Command System for Expanding Incidents class in February 2018. This class included participants from Public Works field staff and partner agencies.
2. The new Community Outreach/Command Vehicle was deployed to the emergency management command post in March 2018 for the predicted evacuation and mud-flow event in the Creek Fire vicinity.
3. Public Works is expanding on its initially completed goal of having 200 Engineers, Architects, and Building Inspectors trained and certified in the Safety Assessment Program. Training has commenced for additional nonregistered engineers and field personnel with duties associated with conducting building assessments following emergency events.
4. Several Public Works employees participated in FEMA and California Governor's Office of Emergency Services Training.
5. Public Works is partnering with several County departments and other stakeholders to review procedures and processes pertaining to sewage overflows.

Priority: Advance Public Works as a Trusted Agency in Emergency Management

1. The completed Unincorporated Area Mass Debris Management Plan has been sent through the California Office of Emergency Services to FEMA for approval.
2. Public Works and partner agencies completed the Operational Area Mass Debris Management Plan Standard Operational Guidelines in March 2018.
3. Department engineers that are members of the Los Angeles County Fire Department California Task Force 2 Urban Search and Rescue Team were deployed to the city of Montecito to assist in rescue and recovery operations immediately following the devastating mudflows.
4. Public Works actively partnering with the Kagel Canyon community, which was greatly impacted by the Creek fire, to assist in their recovery process and to develop a disaster mitigation plan.

Priority: Homeless Outreach

1. In partnership with the Los Angeles County Department of Public Health, Public Works staff deployed and is operating public hygiene facilities around homeless encampments along the Rio Hondo, Los Angeles, and San Gabriel Rivers and in the unincorporated County, Pearblossom Community, in the Antelope Valley. Public Works is actively participating in discussions that may result in expansions of the program. The program serves to help mitigate the spread of Hepatitis A through improved hygiene practices in homeless communities.

Priority: Communication

1. The Department continues to be active on the Emergency Management Council (EMC) and participated in the last EMC meeting on March 14, 2018. The draft Power Outage Annex was presented and approved. Public Works presented on the subject of Emergency Action Plans for Los Angeles County Flood Control Dams. The Fire Department also presented on the Accomplishments and Capabilities of California Task Force 2, of which 4 structural specialists from Public Works are participating. The EMC Subcommittee continued to meet monthly to discuss emergency management subjects relevant to the Operational Area, including plans, training, and exercise opportunities.

Priority: Workforce Reinvestment

1. Public Works assembled a team to recommend functional improvements to the Department Operations Center (DOC). A prioritization is being given to the communications and electronics, including a new Video Wall and stronger connectivity for branches in the DOC. Also, an examination will be made of the DOC layout for potential improvements.
2. Public Works is developing a Continuity of Operations Plan (COOP) team that will be established and ready for the new COOP software the Office of Emergency Management is rolling out during the first Quarter of 2018. Specifications are being developed to utilize consultant services to develop departmental plans.

Business Outreach

Public Works

LOS ANGELES COUNTY

AT A GLANCE

Population:

10M*

(Los Angeles County)

Unemployment Rate:

7.1%

(Los Angeles County – 2015)

(United States: 4.9% – 2016)

FY 2016/17 procured

nearly **\$69 million**
in products and services from local
vendors and small businesses
(All Districts)

*Source: LAEDC Institute for Applied Economics, 2014 Los Angeles County Economic Development Corporation

** This info includes non-district specific data for contracts and jobs created

Business Outreach

Business Outreach support services focus on supporting the County's community economic development through business-friendly contracting opportunities for design, construction, maintenance, and operations of public infrastructure and capital projects.

Community benefits supported:

- Regional economic growth and workforce development
- Local business opportunities

Key issues to be addressed:

- Regional economic growth requiring support for small businesses and social enterprises and development of residents' skills for high-demand jobs
- Need for the construction contracting community to stay current with emerging trends, innovative technologies for modern infrastructure, and new contracting requirements for bidding

Key priorities:

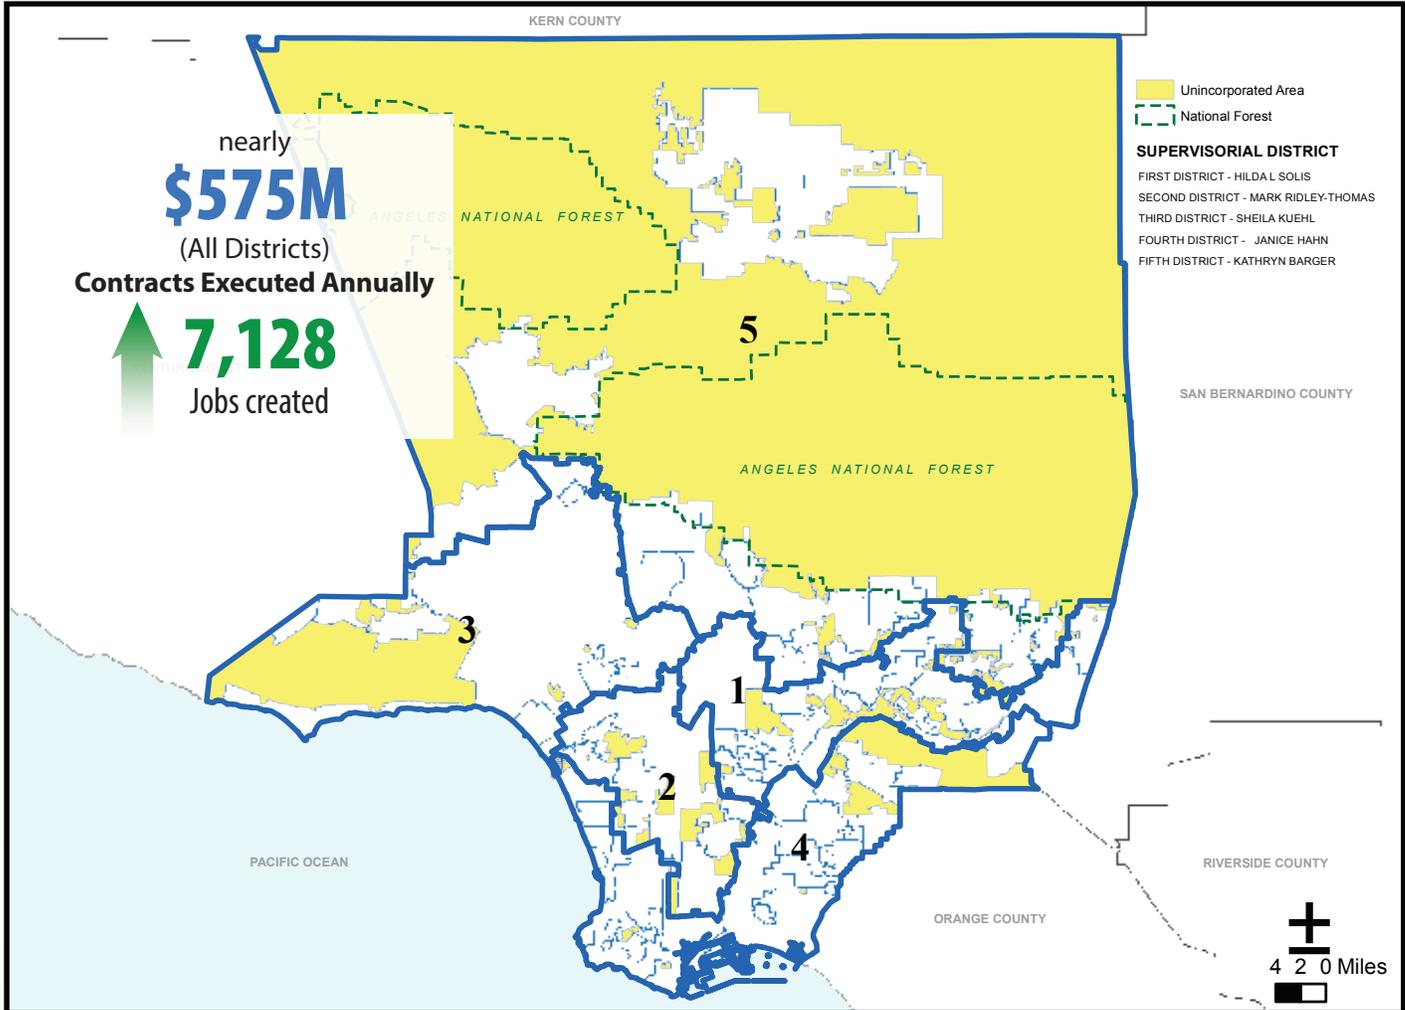

- Support local workforce, job creation and private investment in the community
- Expand the local tax base and social equity across the County's highly diverse communities

Key efforts:

- Implement Small Business Utilization (2016 Board Motion): Goals for Local Small Business (25%) and Disabled Veteran Business Enterprise (3%) in procurement of goods and services by 2020 and certify Social Enterprises.
- Implement Local & Targeted Worker Hire (2016 Board Motion): Starting 2016, goals of 30% mandatory hiring for projects over \$2.5M and best efforts for projects between \$500K and \$2.5M.
- Outreach: Improve communication and collaboration with business community, and establish strategic partnerships with professional organizations, industry coalitions, business community, and chambers of commerce.
