

### **PCH 12-inch Water Line Replacement (Zumirez Road to Escondido Beach Road)**

This project involves the replacement of 9,600 linear feet of 6-inch diameter steel water line with a 12-inch diameter steel water line between Zumirez Road and Escondido Beach Road. The replacement of this older water line will reduce the risk of future leaks and maintain water supply reliability. The project is currently in design and is expected to begin construction in summer 2016.
